PRODUCT INFORMATION

Neoxyd GL

**A Product important for full penetration printing.
Two side printing.**

Most of today's printing style and specially that of dress material require two side printing. This is a natural phenomenon. Anything less than that is not acceptable.

Bleaching and mercerising takes care to a larger extent, but is not guaranteed for every inch of the cloth.

Some wetting agent in printing paste is always added.

People found many solutions to it. Most of the solutions are working for different set of printing style, printing machines and different set of printing colours and pastes.

Neoxyd GL is a universal product. It can be used for all style of printing, machines, colours and pastes.

Neoxyd GL can be used from 0.5% to 2% based on the type of dyes cloth and printing paste and can vary according to one's own requirement.

We recommend taking small trial before going for bulk production.

=====

All information given in this leaflet is without any guarantee of performance. All the information contained in the literature is based on our laboratory trials. One should take bulk trials on field level to suit the conditions of production line practiced at their end.
